### Characteristic anchor load values for wall and clamping bracket AWSS

Anchor type	Max. load [kN]								
	Bracket width [mm]								
BZ 12-15-35/110	10	10	10	10	10	8	7	6.5	5.5

Max. total load F = cable weight + cable tray + bracket. The load capacity values increase considerably when used in uncracked concrete. Observe the load capacity of the brackets (diagram) and the installation conditions of the DIBt approval (anchors). The testing of the widths 710–1010 mm took place at the maximum route width (600 mm) with the load at the end of the bracket.
